## I. INTRODUCTION

Volume I of this report deals with the analysis for the determination of the plotted functions presented in this document. Figures A1 to A54 herein represent acceleration flight data of five Centaur Main Engine Cutoff (MECO) events and selected gimbal axis forcing functions. The Centaur flight numbers and associate spacecraft are given in Table 1. The Centaur gimbal axis forcing functions for the two Mariner Mars '69 flights (Mariners VI and VII) derived from the corresponding field joint acceleration flight data are presented. Selected components of the forcing functions derived from acceleration flight data for the OAO-II and ATS spacecraft are also presented.

Table 1. Centaur Flight Numbers, Associated Spacecraft  
Vehicles and Launch Dates

Flight	Spacecraft	Launch date
AC-16	OA0-II	Dec. 8, 1968
AC-17	ATS	Aug. 10, 1968
AC-18	ATS	Aug. 12, 1969
AC-19	Mariner VII	March 27, 1969
AC-20	Mariner VI	Feb. 25, 1969
